

Robot Maze Rumble

User Manual

1.Running instructions	1
2.Softwares compatible.....	1
3.Menu instructions.....	1
4.Movement.....	2

1. Running instructions

For Windows users:

Click on the .exe file provided to start the game.

For Macintosh users:

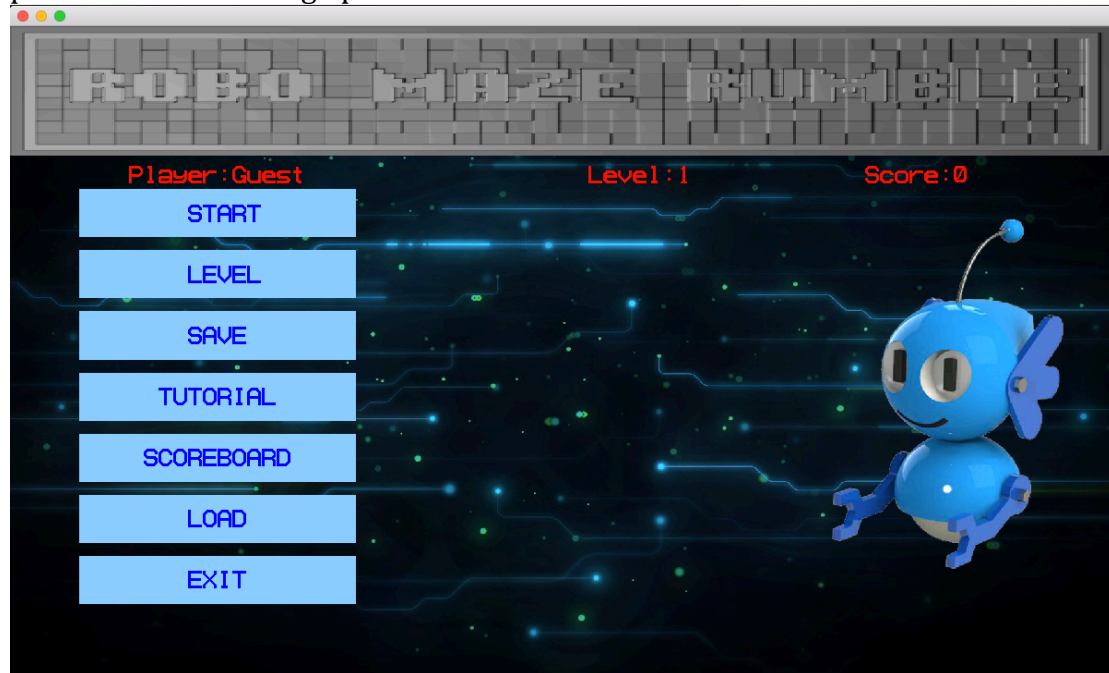

Click on the app file provided to start the game.

2. Softwares compatible

The game is compatible with Visual Studio 12, Visual Studio 13, Xcode 7.

3. Menu instructions

Once the game is loaded, the menu screen is visible to the user. The Menu provides the following options:

Thus the Menu Provides User with the following options:

1. Start a New Game (Level 1)
2. Start From a some New Level (Based on the Proficiency of the User: Guest is always Level 1)
There are only 4 Options available currently. Based on the level you have reached the level is displayed.
3. Save the Profile (Latest Score / New profile)
4. View The Tutorial
5. Scorecard: Leader Board
6. Load an existing profile
7. Exit the Game

Things to keep in mind:

1. The user name must contain exact 6 characters.
2. Once you save a profile you cannot re-write it as a guest.
3. You cannot duplicate your profile.

4. Movement

The movement for the Human controllable robot happens through keyboard inputs.

To move the robot around the maze press the arrow keys as follows:

1. Up arrow key: To move the robot forward
2. Down arrow key: To move the robot backward
3. Right arrow key: To turn the robot to the right
4. Left arrow key: To turn the robot to the left.

To pause, restart the game or go to the menu, press 'ESC'
